PROFESSIONAL SUMMARY

Results-driven Software Engineer and Data Analyst with a strong foundation in Biomedical Engineering. Proven ability to architect scalable web and mobile applications, design secure backend APIs, and transform complex datasets into actionable business insights. Adept at bridging technical development with business strategy to deliver solutions that align with organizational goals.

EDUCATION

Bachelor of Biomedical Engineering Faculty of Engineering, Cairo University | Expected Graduation: 2027

High School Diploma Collège des Frères - Bab El Louk

TECHNICAL SKILLS

- Languages:** Python, TypeScript, SQL, Kotlin
- Front-End:** React, Next.js, Tailwind CSS
- Back-End:** Node.js, Express.js, FastAPI, Django
- Mobile/Cross-Platform:** React Native, Flutter
- Database & Cloud:** PostgreSQL, MongoDB, Supabase
- Data Analytics:** Power BI, Advanced Excel
- Networking & IT:** Linux, CCNA, Virtualization, System Administration

EXPERIENCE

Business Development *Silu* | Dec 2023 – Present

- Coordinate strategic partnerships and manage professional client communications, including drafting NDAs and meeting follow-ups.
- Track project deliverables, organize operational tasks, and align technical progress with overarching business objectives.

Backend Development Intern *LDS* | Sep 2024 – Oct 2024

- Engineered robust backend services for a Laboratory Management System using Node.js and Express.js.
- Implemented secure REST API endpoints and integrated MongoDB for efficient data persistence.
- Optimized database queries, significantly improving system response time for laboratory record retrieval.

Medical Equipment Planning Intern *ECG* | Aug 2023 – Sep 2023

- Supported digital transformation initiatives and compiled comprehensive technical infrastructure documentation for healthcare facilities.

Mobile Development Intern *WE Data* | Jul 2023 – Sep 2023

- Developed robust features for high-traffic mobile utility applications serving thousands of active users.
- Integrated complex backend REST APIs with mobile frontends using Kotlin.
- Collaborated closely with UX/UI designers to ensure responsive and intuitive mobile interfaces.

System Admin & IT Support Intern *Xceed* | Jul 2022 – Sep 2022

- Configured Windows Server environments and managed Active Directory for enterprise users.
 - Maintained HP server hardware and provided critical technical troubleshooting for internal systems.
-

KEY PROJECTS

Pediatric Pulse | Full-Stack Healthcare Platform

- Architected a comprehensive clinic management system with synchronized web and mobile applications.
- Streamlined appointments, patient records, and doctor-staff communication to improve operational efficiency.

Data Analytics Dashboards (Power BI)

- **HR Dashboard:** Transformed raw datasets using Power Query to analyze workforce distribution, promotions, and performance insights.
- **ISP & E-Commerce Dashboards:** Built interactive dashboards to analyze customer segmentation, ARPU, and sales metrics to support strategic operational decisions.

QR Authentication System

- Designed a secure login system utilizing UUID-based QR code generation for touchless authentication.
- Implemented real-time token validation to prevent session hijacking and unauthorized access.

BM - Backend Service

- Developed a modular backend service providing secure API endpoints with authentication support, deployed on a scalable serverless architecture.
